Objective

As a beginner Android developer, my objective is to leverage my passion for mobile technology and programming skills to contribute to innovative and user-friendly Android applications. I am to gain hands-on experience in the entire app development lifecycle, from conceptualization and design to implementation and testing. My goal is to continuously enhance my proficiency in Android development by staying updated on the latest industry trends, best practices, and emerging technologies. I am eager to collaborate with experienced developers, learn from their expertise, and make meaningful contributions to the dynamic world of mobile app development

Education

Shree Swami Vivekanand College, Surendranagar

Android Design, Google Material, Android Navigation Drawer, User Interface Design

Android SDK, Google API,

Bit bucket, Knowledge with Google Maps, Here Map's Implementation.

Firebase Features like push Notifications, Authentication, Realtime Database, etc.

Dynamic liking and authentication.

Dependency injection

Problem Solving

Projects

Expense Manager

- Create an easy-to-use interface for effortless expense tracking.
- Allow users to quickly input and categorize their Income.
- Allow users to quickly input and categorize their expenses.
- Provide a clear overview of users' spending against set budgets.

College App

- If you're looking for a simple text-based collage app with both an admin and user interface, you may need a more customized solution.
- This high-level breakdown provides a roadmap for developing a text-based collage app with an admin and user interface.
- Each step can be broken down further into more detailed tasks based on the specific requirements of your application.

Milk Counter

- Creating a milk counter app for both the milkman and the customer involves designing a user-friendly interface for tracking and managing milk deliveries.
- Create an account with basic details. Profile management with contact information and delivery preferences.
- Plan and optimize delivery routes to save time and resources.
- Add, edit, or remove customer details.
- Choose the type and quantity of milk for delivery.
- Implement secure authentication and data encryption.
- Design an accessible user interface for users with different abilities.

Easy Chat

- Develop a user-friendly chat interface that allows users to send and receive messages.
- Firebase Cloud Messaging (FCM) for Android

Portfolio App

- Welcome to the Simple Portfolio App - your gateway to a streamlined presentation of professional information.
- Designed for simplicity and clarity with a straightforward user interface.
- Easily showcase your skills in a dedicated section.
- Highlight your projects with brief descriptions.
- Cleanly presented details about your academic journey create a foundation for your professional story.

Foodator

- Found something that makes your taste buds tingle? Simply tap on the item to view details and hit the "Add to Cart" button.
- Your chosen items will be neatly added to your virtual cart.Wondering what's in your cart so far? Head over to the cart icon to review your selected items.
- You can easily adjust quantities or remove items if needed.
- Our user-friendly interface ensures a smooth and enjoyable experience from start to finish.
